

DIRECT TESTIMONY AND EXHIBIT OF
STEPHEN J. BARON
ON BEHALF OF
THE SOUTH CAROLINA OFFICE OF REGULATORY STAFF
DOCKET NO. 2019-224-E
DOCKET NO. 2019-225-E
IN RE: SOUTH CAROLINA ENERGY FREEDOM ACT (HOUSE BILL 3659)
PROCEEDING RELATED TO S.C. CODE ANN. SECTION 58-37-40 AND
INTEGRATED RESOURCE PLANS FOR DUKE ENERGY CAROLINAS, LLC
AND DUKE ENERGY PROGRESS, LLC

Q. STATE YOUR NAME, BUSINESS ADDRESS AND OCCUPATION.

A. My name is Stephen J. Baron and I am President and a Principal of J. Kennedy and Associates, Inc. ("Kennedy and Associates"). My business address is 570 Colonial Park Drive, Suite 305, Roswell, Georgia, 30075.

Q. DESCRIBE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE.

A. I graduated from the University of Florida with a B.A. degree with high honors in Political Science and significant coursework in Mathematics and Computer Science. I received a Master of Arts Degree in Economics, also from the University of Florida. My areas of specialization were econometrics, statistics, and public utility economics. My thesis concerned the development of an econometric model to forecast electricity sales in the State of Florida, for which I received a grant from the Public Utility Research Center

1 of the University of Florida. In addition, I have advanced study and coursework in time
2 series analysis and dynamic model building.

3 I have more than forty (40) years of experience in the electric utility industry in the
4 areas of integrated resource planning, load forecasting, cost of service and rate analysis,
5 and economic analysis and have testified as an expert witness in hundreds of cases in states
6 across the United States including, Arizona, Arkansas, Colorado, Connecticut, Florida,
7 Georgia, Indiana, Kentucky, Louisiana, Maine, Michigan, Minnesota, Maryland, Missouri,
8 Montana, New Jersey, New Mexico, New York, North Carolina, Ohio, Pennsylvania,
9 South Carolina, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming,
10 as well as before the Federal Energy Regulatory Commission and in United States
11 Bankruptcy Court. A summary of my education, experience, and expert testimony
12 appearances is included in Exhibit SB-1.

13 **Q. ON WHOSE BEHALF DO YOU PROVIDE THIS TESTIMONY?**

14 **A.** I am providing this testimony on behalf of the South Carolina Office of Regulatory
15 Staff (“ORS”).

16 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE PUBLIC SERVICE**
17 **COMMISSION OF SOUTH CAROLINA (“COMMISSION”)?**

18 **A.** Yes. I testified in the Dominion Energy South Carolina (“DESC”) 2020 IRP case,
19 Docket No. 2019-226-E.

20 **Q. DESCRIBE THE PURPOSE OF YOUR TESTIMONY.**

21 **A.** The purpose of my testimony is to describe my role in Kennedy and Associates’
22 review of Duke Energy Carolinas’ (“DEC”) and Duke Energy Progress’ (“DEP” and
23 collectively the “Companies”), 2020 Integrated Resource Plans (“IRP”), including the

assessment of the Companies' compliance with the statutory requirements of S.C. Code Ann. Section 58-37-40 ("Section 40"), as amended by the South Carolina Energy Freedom Act ("Act 62"). Together with the ORS team and my colleagues, Mr. Lane Kollen and Mr. Philip Hayet, and other consultants at Kennedy and Associates, we prepared two reports entitled, "Review of Duke Energy Carolinas, LLC 2020 Integrated Resource Plan" (the "DEC Report") and "Review of Duke Energy Progress, LLC 2020 Integrated Resource Plan" (the "DEP Report"). These are referred to in my testimony jointly as the "ORS Reports." Copies of the ORS Reports are attached to ORS witness Anthony Sandonato's direct testimony as Exhibit AMS-1 and AMS-2. The ORS Reports include the findings, conclusions, and recommendations based on the review of DEC's and DEP's IRPs. Messrs. Kollen and Hayet also filed direct testimonies in this proceeding and discuss their responsibilities associated with the ORS Reports.

Q. DESCRIBE THE SCOPE OF KENNEDY AND ASSOCIATES' REVIEW OF DEC'S AND DEP'S IRPS.

A. Kennedy and Associates performed a comprehensive review of the Companies' planning processes and IRP filings. As part of the review, Kennedy and Associates investigated the historical context of the IRP process in South Carolina, including the Act 62 requirements, prior DEC and DEP IRP filings, and Commission orders. Kennedy and Associates reviewed all of the significant features of DEC's and DEP's IRPs, including the load and energy forecasting process, resource adequacy analyses and planning reserve margin targets, demand side management assumptions, natural gas and carbon dioxide price forecasting methodologies, existing supply side resources, development of generic new supply side resources, alternative resource plans that reflect the timing, type, size, and

1 cost of new resource additions and retirements of existing resources, production cost
2 modeling, capital revenue requirement analysis, economic analyses and ranking of
3 expansion plan results, transmission system planning process and potential investments,
4 and plans for distribution and integrated system planning. Kennedy and Associates then
5 assessed whether the Companies complied with the statutory requirements of Section 40,
6 including the Act 62 amendments.

7 **Q. WHAT WERE YOUR PRIMARY RESPONSIBILITIES WITH REGARD TO THE**
8 **ORS REPORTS?**

9 **A.** The ORS Reports were a collaborative effort developed by the three Principals and
10 other members of Kennedy and Associates, and I had the primary responsibility for
11 developing the following sections:

- 12 • Load and Energy Forecast
- 13 • Resource Adequacy

14 Mr. Kollen and Mr. Hayet describe their responsibilities in their respective direct
15 testimonies and Mr. Hayet summarizes the conclusions of ORS Reports in his direct
16 testimony.

17 **Q. PLEASE SUMMARIZE THE CONCLUSIONS OF YOUR ANALYSIS.**

18 **A.** Although the ORS Reports contain much more detail, I provide a brief summary of
19 my conclusions and recommendations applicable to the areas for which I had primary
20 responsibility. First, because the methodologies employed by DEC and DEP to develop
21 their respective load and energy forecasts and planning reserve margin targets are the same
22 for DEC and DEP, the evaluation approach of the Companies' IRPs by ORS was the same.

1 The conclusions and recommendations discussed by ORS in each Report on load
2 forecasting and resource adequacy issue are also consistent for DEC and DEP.

3 With regard to the load and energy forecasts, ORS determined that the forecasts
4 meet the requirements of Act 62, are reasonable, and represent a high level of
5 methodological sophistication. During the 2021-2035 forecast period, DEC projects an
6 average annual growth rate of 0.7% in energy requirements, and average annual growth
7 rates of 0.9% in summer and 0.7% in winter peak loads. For DEP, the forecasts project an
8 average annual growth rate of 0.7% in energy requirements, and average annual growth
9 rates of 0.9% in summer and 0.7% in winter peak loads. Each of the forecasts reflects
10 embedded energy efficiency (“EE”), adjusted to reflect roll-offs of EE program impacts as
11 they reach their expected termination date. Incremental (new) EE is then reflected as a
12 separate adjustment to the peak load forecast. The peak load forecasts do not include
13 demand reductions that can be called by the Companies pursuant to demand side
14 management (“DSM”). DSM is reflected as a capacity resource in the IRP.

15 The Companies developed econometric based models to forecast energy sales to
16 the residential, commercial, and industrial classes. For the residential and commercial
17 classes, they employ average kilowatt-hour (“kWh”) use per customer models using a
18 Statistically Adjusted End-use (“SAE”) methodology and a separate projection of the
19 number of customers. These types of models incorporate a significant amount of detailed
20 information on customer end-uses (e.g, HVAC equipment, household appliances,
21 commercial building characteristics) that permit modeling of end-use efficiency
22 improvements during the forecast horizon.

1 For the industrial sector, the Companies use traditional econometric models in
2 which usage is driven by manufacturing activity indices (Industrial Production Index) and
3 the price of electricity.

4 Finally, the Companies' developed a single model to forecast both summer and
5 winter peak load. The peak load models are estimated using monthly data and are primarily
6 driven by composite variables reflecting cooling load, heating load and non-weather
7 sensitive load.

8 **Q. WHAT ARE YOUR CONCLUSIONS WITH REGARD TO THE COMPANIES'**
9 **LOAD AND ENERGY FORECASTS?**

10 **A.** Based on our review of the Companies' methodologies, models and independent
11 assumptions regarding future population growth, economic activity, and end-use
12 efficiency, the load and energy forecasts are reasonable. Although the Companies are
13 projecting future megawatt-hour ("MWh") and peak load growth to be greater than the
14 historic period, the forecasts are reasonable. The Companies' methodology is reasonable
15 and reflects a high level of sophistication.

16 **Q. DID YOU IDENTIFY ANY ISSUES REGARDING THE COMPANIES'**
17 **FORECASTS?**

18 **A.** Yes. Notwithstanding the finding that the forecasts are reasonable, it would
19 improve the Companies' IRPs if additional detail were included on the specific models and
20 statistical results that underlie the energy sales and peak load forecasts. While the IRPs
21 contain a technical appendix that discusses the forecast methodology and results, the
22 appendices do not present the actual econometric models used to develop the forecasts. In
23 particular, the Companies' models incorporate multiple composite variables that represent

1 the main drivers of the forecasting models (e.g., electric price, income, end-use saturation
2 and efficiency). The composite variables were opaque, but ORS ultimately obtained the
3 information through a series of discovery requests and subsequent responses provided by
4 the Companies.

5 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING THE COMPANIES’**
6 **LOAD AND ENERGY FORECASTS?**

7 **A.** Yes. I recommend the Companies each provide a technical appendix that more
8 fully describes each of the models, presents the statistical results and shows the individual
9 energy and peak load forecast results that were actually developed. While the IRPs provide
10 an overview of this information, they do not provide the detail necessary to fully evaluate
11 the entire forecast without substantial discovery. Given the importance of this information,
12 it should be included as part of DEC’s and DEP’s future IRPs.

13 **Q. PLEASE DISCUSS THE COMPANIES’ RESOURCE ADEQUACY AND**
14 **RESERVE MARGIN ANALYSES.**

15 **A.** The Companies resource planning reserve margins, which drives, to a large extent,
16 the need for generating resources in the 2020 IRPs were developed by Astrapé Consulting
17 using its Strategic Energy and Risk Valuation Model (“SERVM”). SERVM is used by
18 Astrapé to develop a loss of load expectation (“LOLE”) based reserve margin calculation.
19 The SERVM analyses model each of the key factors that impact reliability – the ability of
20 the Companies’ generating resources at various reserve margins to meet customer load
21 without exceeding the 1 day in 10-year LOLE criterion. A 1 day in 10-year LOLE is a
22 generally accepted standard in the electric utility industry to determine a resource planning
23 reserve margin target. The Companies’ SERVM analyses represent a sophisticated

1 modeling approach that is used by a number of electric utilities, including TVA, Southern
2 Company and Louisville Gas and Electric/Kentucky Utilities.

3 **Q. WHAT WERE THE RESULTS OF THE COMPANIES' ANALYSES?**

4 **A.** Based on the SERVМ analyses, DEC requires a winter peak reserve margin of 16%
5 to meet a minimum 1 day in 10-year LOLE criterion. For DEP, the required winter peak
6 reserve margin is 19.25%.

7 **Q. ARE THESE THE SAME RESERVE MARGINS USED BY THE COMPANIES IN**
8 **THE 2020 IRP PLANNING ANALYSES?**

9 **A.** No. For purposes of long-term planning, the Companies each used a 17% winter
10 peak load reserve margin, which is based on an analysis of the reliability requirements
11 needed to meet a 1 day in 10-year LOLE on a combined DEC/DEP basis. This is a
12 reasonable approach in light of the support that is mutually provided by each company to
13 the other company. The actual combined DEC and DEP SERVМ results on a combined
14 basis was 16.75%, slightly less than the 17% target adopted by the Companies.

15 **Q. WHAT DID ORS CONCLUDE REGARDING THE COMPANIES' RESOURCE**
16 **ADEQUACY ANALYSIS?**

17 **A.** Overall, ORS concludes that the Companies' 17% winter peak reserve margin
18 meets the requirements of Act 62, is reasonable, and is based on a methodology that
19 represents a high level of sophistication.

20 **Q. HOW DOES THE COMPANIES' 17% WINTER PEAK RESERVE MARGIN**
21 **TARGET COMPARE TO OTHER REGIONAL UTILITIES?**

1 **A.** A 17% winter peak reserve margin is generally consistent with the target winter
2 peak reserve margins used by a number of utilities in the Mid-Atlantic and Southeast areas,
3 as shown in Table 10 of the ORS Reports.

4 **Q. DO YOU HAVE ANY RECOMMENDATIONS WITH REGARD TO RESOURCE**
5 **ADEQUACY AND RESERVE MARGIN ISSUES?**

6 **A.** Yes. I recommend the Companies provide a more detailed discussion of the
7 specific methodology used to develop the synthetic loads for extreme low temperature
8 periods. The Companies' Resource Adequacy Reports, which are part of their IRPs, do
9 not provide sufficient detail regarding how the analysis was conducted or what specific
10 additional adjustments were made to the load data at extreme low temperatures. This issue
11 is discussed in detail in the ORS Reports.

12 In addition, I recommend the Companies further develop their methodology to
13 model the effects of extreme low temperatures on winter peak load. Given the significance
14 of this issue, as discussed in the ORS Reports, I recommend that the Companies examine
15 alternative methodologies to develop its synthetic loads in hours in which the temperatures
16 fall significantly below the temperatures experienced during the weather/load estimation
17 period (i.e., neural net model training period).

18 Finally, as discussed more fully in the ORS Report, I recommend that the
19 Companies each provide a detailed discussion in the IRPs or appendices that explains how
20 the results of the Astrapé 2018 Solar Capacity Value Study were used to derive the assumed
21 1% winter peak standalone solar capacity value planning assumption used in the IRPs.
22 This information should be included in a modified IRP in this proceeding.

1 **Q. WILL YOU UPDATE YOUR DIRECT TESTIMONY BASED ON INFORMATION**
2 **THAT BECOMES AVAILABLE?**

3 **A.** Yes. ORS fully reserves the right to revise its recommendations via supplemental
4 testimony should new information not previously provided by the Company, or other
5 sources, becomes available.

6 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

7 **A.** Yes.
